CONFIDENTIAL - INTERNAL USE

Case ID: CASE-2026-0007

Title: FINAL ACCEPTANCE - suspicious outbound traffic

Analyst: analyst

Date: 2026-09-21 18:25:49 UTC

Status / Priority: OPEN / HIGH

Executive Summary

Case CASE-2026-0007 ('FINAL ACCEPTANCE - suspicious outbound traffic') was opened by analyst on 2026-09-21T18:25:42.537455+00:00. The investigation attached 4 evidence item(s), 2 indicator(s), 2 saved investigation(s) and 0 NIDS detection(s). 0 external threat-intelligence result(s) returned data. All statements below are traceable to the evidence sources listed at the end of this report.

Scope

Investigated indicators and evidence types: hash, investigation, ioc. Section-30 acceptance workflow: IP, URL, hash, log, IOCs, notes, report.

Indicators

-
- [hash] d41d8cd98f00b204e9800998ecf8427e (CALCULATED)
 - [ioc] 198.51.100.23 (EXTRACTED)

Technical Findings

* IPV4: 8.8.8.8 (investigated 2026-09-21T18:24:44.698798+00:00)

Analyst Assessment (Interpretation)

2026-09-21T18:25:47.903416+00:00 analyst:

Analyst assessment: 198.51.100.23 produced 4 auth failures and a /etc/passwd probe in the uploaded access log. Threat-intel providers are NOT CONFIGURED, so no external reputation is asserted; findings rest on observed log evidence only.

Evidence Sources

-
- AbuseIPDB (NOT CONFIGURED)
 - AlienVault OTX (NOT CONFIGURED)
 - DNS A query (platform resolver) (observed)
 - GreyNoise (NOT CONFIGURED)
 - VirusTotal (NOT CONFIGURED)
 - reverse DNS (OS resolver) (observed)

Disclaimer

Observed facts are measurements made by this platform (packet capture, DNS/TLS queries, local file hashing). Calculated values are derived locally from supplied input. External intelligence is quoted verbatim from the named provider with a retrieval timestamp and may be incomplete or stale. Analyst notes are interpretation and are labelled as such. Absence of a threat-intelligence result does not imply an indicator is safe.
